2019

WINNER

Rosemary Gardens, Sustainable Food Systems - Raynor Foods Ltd.

Our most significant and crowning development this year must be the commissioning and up-scaling of Rosemary Gardens. This is our on-site hydroponic, vertical, self-contained farm that is comprised of multiple growing units.

These units are designed around ebb and flow water systems, which utilise third generation LED grow-light technology and has an in-built UV water filtration system and fully programmable lighting and irrigation systems.
