

NULOGY MULTI-ENTERPRISE PLATFORM

The Nulogy Supplier Collaboration Solution

Supply chain disruptions. Retail requirements. Volatile consumer demand.

It is more critical than ever for fast-moving consumer goods (FMCG) supply chains to be digitally-enabled, agile, and resilient. Forward-thinking companies recognize that their supply chain partners can help them respond to volatile market conditions and bring products to market more quickly and cost-effectively. Many companies, however, lack the technology to properly collaborate and share information with their supply chain partners in order to capitalize on these opportunities.

By 2026, more than 50% of large organizations will compete as collaborative digital ecosystems rather than discrete firms – sharing inputs, assets and innovations ... Ecosystems that share end-to-end supply chain information in real time will be able to provide a better and faster response to unexpected changes in supply or demand.

– GARTNER, INC., "THE RISE OF THE ECOSYSTEM," 2022.

As part of the Nulogy Multi-Enterprise Platform, the Nulogy Supplier Collaboration Solution helps supply chain partners—such as brands, contract manufacturers, co-packers, value-added 3PLs, and raw and packaging suppliers—work smarter together through dynamic collaboration. Nulogy’s Supplier Collaboration Solution provides shared transparency into the deep transactional data of the supply ecosystem, and helps bridge the gap between isolated enterprise systems. Nulogy provides a single, centralized, cloud-based multi-echelon network where any party can be a source of demand and supply, digitally transforming the way you and your partners work together.

Key Benefits

ADAPT AND RESPOND FASTER

Respond quickly to market opportunities through real-time materials and production visibility across the supply ecosystem. Ensure that you’re working collaboratively with your partners to launch products faster and fulfill orders on-time and in-full.

DRIVE DEEP COLLABORATION

Collaborate frictionlessly on order planning and execution across a network of external supply chain partners, bringing products to market with ease, speed, and quality, while minimizing waste and reducing costs.

ELIMINATE AVOIDABLE COSTS

Pre-empt order issues by automating alerts for at-risk orders, helping to ensure on-time, in-full fulfillment and avoiding related costs such as late penalties, expedited shipping, and materials write-offs.

SCALE YOUR EXTERNAL NETWORK

Expand your external network by quickly and easily connecting with new partners on a cloud-based platform that aggregates data from heterogeneous enterprise systems and standardizes visibility and collaboration.

ACHIEVE SUSTAINABILITY

By gaining visibility into quantity and lot codes of raw materials and finished goods, supply chain partners can improve the movement and usage of materials throughout the extended supply chain to reduce potential shortages and write-offs, helping achieve waste reduction goals. By having visibility of quantity and lot codes of raw materials and finished goods, supply chain partners can improve the movement and usage of materials throughout the supply ecosystem to reduce potential shortages and write-offs, and achieve waste reduction and sustainability goals.

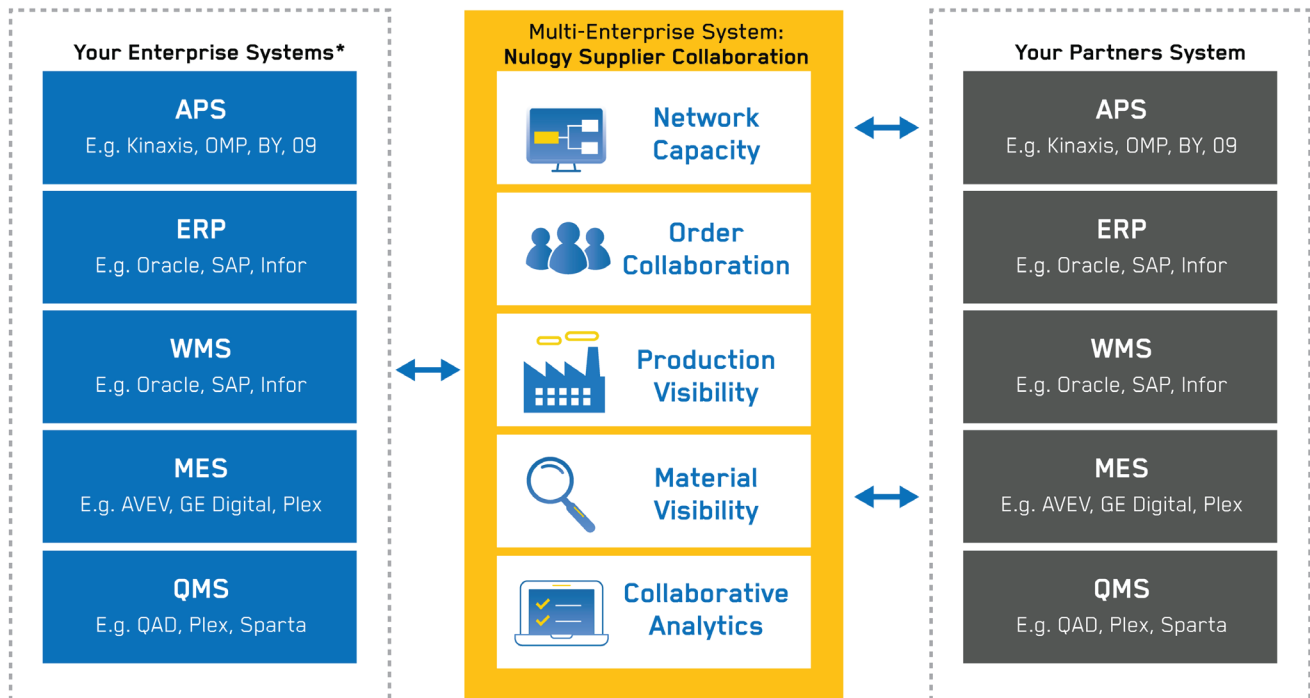

Digitally Enabling the Supply Ecosystem

The Nulogy Multi-Enterprise Platform enables the digitization of information flow and decision making between you and your external supply chain partners.

In real-time or near real-time, the Nulogy Supplier Collaboration Solution enables multi-party dynamic collaboration to improve efficiency, visibility, and responsiveness, while complementing and synchronizing with enterprise solutions, such as ERP, APS, WMS or MES solutions.

The Nulogy Platform complements and amplifies the investments companies have made in their enterprise systems—extending their digitalized systems from single enterprise to multi-enterprise. Partner supply chain data enables multi-enterprise process planning, execution, measurement, analysis and optimization.

Expanding to a Multi-Enterprise Platform

*Ask us about the benefits of using Nulogy's ShopFloor Solution in concert with Supplier Collaboration

MATERIALS VISIBILITY

Track inventory as it moves through the supply ecosystem to quickly adjust production schedules and inventory levels against volatile demand and supply signals.

ORDER COLLABORATION

Collaborate with your supply chain partners in a centralized platform to provide a single source of truth on all production order information including in-progress order tracking.

NETWORK CAPACITY

Align with your supply chain partners on orders and forecasts to manage capacity allocation and achieve optimal outcomes. Gain full visibility into capacity across the network.

COLLABORATIVE ANALYTICS

Leverage collaborative and actionable insights shared between trading partners for key KPIs such as OTIF, inventory levels, and production metrics to improve network performance and drive continuous improvement.

BILL OF MATERIALS

Working with your trading partners, align finished product order demand with available and ordered raw and pack materials. Additionally, enable all parties to share data and collaborate on up-to-date Bills of Materials across the network.

CONNECTIONS

Using powerful, low-code/no-code integration capabilities, connect with any partner system to consolidate critical production data into a consistent data model. Synchronize on order status, inventory availability, network capacity and more.

Start your digitalization journey today. See how Nulogy can transform the way you and your external supply chain partners work together.
